# Hoping to Create a Better World and to Create Happier Lives for Families Worldwide

GUO Guangchang, Chairman of Fosun International

*“We hope to create a better world and to create happier lives for families worldwide, so that more people can live till the age of 121 with health, happiness and wealth.”*

Good evening, Fosuners! I am delighted to join you at the Fosun's 30th Anniversary ONE FOSUN Family Members' Carnival today and I would like to have a heart-to-heart with you here and share some of my thoughts.

This year marks the 30<sup>th</sup> anniversary of Fosun. I know our youngest

Fosuners were born in the 2000s and many Fosuners are still in their twenties. In fact, when my friends and I founded Fosun, we were also in our twenties. We started Fosun in a single-storey house near Fudan University and now Fosun has become a global consumer group with businesses covering more than 30

countries and regions around the world. We have also expanded from an entrepreneurial team with only a few people at the beginning to more than 120,000 employees worldwide today. All of the Fosuners should be proud of Fosun's achievements in the past 30 years. The journey was full of challenges as well as laughter and

tears. I would like to thank those who have supported and helped Fosun along the way, it is your love that make us thrive; I would also like to express my appreciation to all friends who have given advice and encouragement to Fosun along the way, it is you who have helped Fosun to stay focus and be fearless; Last but not least, I appreciate all Fosuners. No matter when you joined Fosun, or maybe you have already left Fosun, we are a family. Thank you for your support to Fosun, and I hope that Fosun has brought warmth to you all.

Thirty years ago, bicycles were basically the means of transportation for university students, including myself. I was pretty good at it. Once, I biked to Hainan with my friends from Fudan University. We founded Fosun because when we were students at Fudan University, we biked to Hainan and Beijing together and during that trip, we really felt the changes brought about by the reform and opening up, and realized that business can bring great changes and improvement to society. Therefore, we established the corporate values of “business for good” when we first started Fosun. At the beginning of our business, we were always on the frontline, we biked to school, to the office and to meet clients. I remember that it was raining heavily on the day that we finished our first consulting project, so we picked a restaurant nearby to celebrate. It was a fancy restaurant. Since water symbolizes wealth in the Chinese world, at that time, we felt that this was a blessing to us and we were full of confidence in the future. That is to say, we started Fosun by biking to the office and to meet clients. For many years after that, no matter whether we were engaged in medicine or real estate, we believe that we must adhere to the entrepreneurial spirit by getting involved and fighting on the frontline. This is also one the spirits that

we must uphold, as I always say, we must let the professionals who understand business to operate, and we must always keep learning and work hard to be 0.01 second faster than our competitors.

Later, in 2007, Fosun International was listed in Hong Kong, and we started to consider globalization. I remember that in 2015, the team and I were waiting for the acquisition to close at Club Med headquarters. In fact, the acquisition of Club Med is an important milestone in Fosun’s globalization history, and Club Med is our first brand with global significance. Now that the world is facing many challenges, Fosun’s globalization capabilities are especially valuable to China and Fosun itself.

The third moment is my encounters with rural doctors. The Rural Doctors Program is a project that Fosun Foundation has been running for five years. Five years ago, I visited a village clinic in Zizhou, Shaanxi for the first time and I met Zheng Zhuqian, a 67-year-old rural doctor at the time. In fact, rural doctors hold a special place in my heart. When I was a child, I got acute hepatitis in the countryside. Thankfully, a rural doctor treated me in time and I recovered. Later that year, I met Dr. Zheng once at the Rural Doctors Conference and he gifted me a pair of couplets written by himself. “We protect rural doctors, and rural doctors protect everyone.” I believe that it is not just a pair of couplets, but also the persistence of Fosuners. While developing business, we must also contribute to society with love and care. “Self-improvement, Teamwork, Performance, and Contribution to Society” are the original aspiration and corporate values that we have always adhered to.

There is another moment that I would like to share in particular. Whenever I am working in Shanghai and the banks of the Huangpu River are ablaze with lights at

night, I would look out from the office to admire the view of the Bund, the BFC and the Yuyuan Garden. I think it is the most gorgeous view of Shanghai. Also, whenever I am in New York for a business trip, I am always amazed by 28 Liberty and how beauty transcends time and borders. I hope that when people see BFC a century later, they recognize its beauty from the bottom of their hearts. I believe that Yuyuan Garden Lantern Festival will still be held at that time. Fosun, including Lanvin, Wolford, St. John, Sergio Rossi of our Lanvin Group, as well as Wolverhampton Wanderers F.C. in the Premier League, strive to create a more beautiful world. We must refine our products to the best, provide the best service, and offer the best user experience. As challenging as it can be, we must insist on doing the right things, difficult things, and things that takes time to develop.

This year marks the 30th anniversary of Fosun and we will remain our original aspiration. We hope to create a better world and to create happier lives for families worldwide, so that more people can live till the age of 121 with health, happiness and wealth. At thirty, Fosun and all Fosuners promise to uphold the original aspiration of “Contribution to Society” and forge ahead. We also hope that Fosuners will continue to create personal breakthroughs in the future, have the courage to try, and expand your horizons so as to create breakthroughs for Fosun. Fosun family always welcomes Fosuners with ideas, capabilities, and ambitions to forge ahead and shoulder more responsibilities. I strongly believe that more opportunities are waiting for us and the world, China and Fosun will all be better in the next 30 years. Thank you all!

*(Excerpt from GUO Guangchang’s speech on Fosun’s 30<sup>th</sup> Anniversary ONE FOSUN Family Members’ Carnival on Dec. 15, 2022)*

WANG Qunbin, Co-Chairman of Fosun International

CHEN Qiyu, Co-CEO of Fosun International

XU Xiaoliang, Co-CEO of Fosun International

## WANG Qunbin: Fosun's Classmates Will Always be Our Most Precious Assets

What impressed me most was that when Fosun started its business, after I developed the first PCR hepatitis B diagnosis reagent product of Fosun Pharma, Mr. Guo said to me: Everyone's energy is limited, and we have to be good at finding people to do business together.

In fact, we named the company 'Fosun', which means "one after another star" in Chinese. We hope that, in the future, more and more outstanding talents, who agree with Fosun's values of 'self-improvement, teamwork, performance and contribution to society' will join us.

Thank all the classmates for your support and help to Fosun over the past 30 years. In the next 30 years, Fosun will continue to adhere to the original aspiration to "do business for good" and make contribution to shape a happier life for global families.

*(Excerpt from WANG Qunbin's speech on Fosun's 30<sup>th</sup> Anniversary ONE FOSUN Family Members' Carnival on Dec. 15, 2022)*

## CHEN Qiyu: Innovating with Integrity and Going Far with Prudence in Fosun's Next 30 Years

Over the past 30 years what stood out special for me is that Fosun's HANLIKANG (rituximab injection), which is China's first bio-similar drug, was officially approved for market launch in February 2019. Throughout the history of Fosun Pharma and of Fosun as a whole, an emphasis has been placed on technological innovation as a driving force behind development. The two companies gathered scientists from all over the world to work out cures for illnesses. Today, Henlius is still at the forefront of the development of biopharmaceuticals and bio-innovative drugs in China. This is something that I am really proud of.

I think we can use 'innovating with integrity' and 'going far with prudence' to sum up what will happen at Fosun in the next 30 years. Fosun's development is a long and arduous journey so we should not make it in haste. "Going far with prudence" is our watchword.

*(Excerpt from CHEN Qiyu's speech on Fosun's 30<sup>th</sup> Anniversary ONE FOSUN Family Members' Carnival on Dec. 15, 2022)*

## XU Xiaoliang: Absolutely Sure about Fosun's Bright Future

It is our involvement in the creation of BFC and witnessing its completion.

From land acquisition, groundbreaking, concrete base pouring, enclosure construction, topping off, completion to opening. From selling the first ticket of a show at Fosun Foundation Art Center, to the first tenant moving into the BFC office building, and then to the opening of the first branded outlet at the BFC shopping mall. From 2010 to 2019, Fosuners toiled for ten years at establishing a new landmark at the Bund. All these flashbacks are still vivid and fresh in my memory. We have eventually succeeded in spite of occasional difficulties.

I am absolutely sure about Fosun's bright future. The Grand Yuyuan Garden Zone as a project affords immense room for imagination. This rare element affords us an opportunity to create a brand-new image for the city of Shanghai. My ultimate dream is to fulfill Fosun's original aspiration to "contribute to society" and its mission to "create happier lives for families worldwide".

*(Excerpt from XU Xiaoliang's speech on Fosun's 30<sup>th</sup> Anniversary ONE FOSUN Family Members' Carnival on Dec. 15, 2022)*

## SPECIAL ISSUE

# WHAT MAKES AN EXPERT?

The year 2022 marks the 30<sup>th</sup> anniversary of Fosun as it enters a particularly formative stage of entrepreneurship. We take this opportunity to launch a special column — “Fosun 30<sup>th</sup> Anniversary Series, EXPERT” to seek for those important contributors working in the frontline and as the backbone of Fosun’s ecosystem, and record their stories. EXPERT features specific individuals and goes behind the scenes of the creation of happier lives for families worldwide.

An expert is a general term for practitioners with superb skills or special technical abilities. They are engineers, designers, R&D specialists, and veteran artisans, to name only a few. Their enduring dedication, tenacity and pursuit of high-quality products have allowed Fosun to overcome economic cycles and develop into a well-established company, creating happiness for society.

Talents have always been the most valuable assets of Fosun over the past 30 years. It is the constellation of talents that helps build the solid foundation for Fosun to gain a foothold in the market. Finite words here can only offer a glimpse into the endeavors of a few contributors. Behind the scenes, there are more of them who may not be mentioned by name this time but are equally admirable. Therefore, EXPERT is dedicated to all talents who have been working hard for Fosun.

Cyrus A. Baidoo, Marketing Manager of Fosun Pharma Sub-Saharan Africa

**Cyrus A. Baidoo:**

## With Artesun<sup>®</sup>, I am Fighting Against Malaria in Africa

**WRITTEN By LI JIAYIN,  
VIDEO By CYRUS A. BAIDOO,  
XUE JIAYUE, LI JIAYIN**

This issue features an expert from Africa who is very familiar with Chinese drugs. Cyrus A. Baidoo is the marketing manager of Fosun Pharma Sub-Saharan Africa focusing on antimalarial drugs.

Currently, malaria remains the most serious disease on the African continent. According to the world malaria report 2021 published by the World Health Organization (WHO) in 2020, there were an estimated 241 million cases of malaria worldwide and 627,000 malaria-related deaths in the world. Among which, more than 95% of the cases occurred in Africa.

### *To be a marketing manager in Sub-Sa- hara Africa*

Graduated from Kwame Nkrumah University of Science And Technology in Ghana with a major in pharmacy, As a native Ghana, Cyrus has been working in the African pharmaceutical industry for 12 years and has worked at Fosun Pharma for eight years.

The breakthrough started in 2005. On 21 December 2005, the artesunate tablet independently developed by Fosun Pharma obtained WHO pre-certification (WHO-PQ). From then on, Chinese enterprises and opened up the channel for selling artesunate products overseas.

Today, Tridem Pharma Ghana has developed from a team of four to 15 staff. Cyrus has also been promoted from the manager in Ghana to the marketing manager of Fosun Pharma (Sub-Sahara Africa) focusing on antimalarial drugs. Since 2007, its inde-

pendently developed antimalarial drugs began to enter the African market, Artesun<sup>®</sup> (artesunate for injection) obtained WHO-PQ in 2010, and now Fosun Pharma has become the global leader in malaria drugs and the most influential Chinese pharmaceutical brands in Africa.

### *"Your drug is magic!"*

This influence comes from the product itself, but also from the reputation established in the process of cooperating with local institutions and frontline medical staff. In addition to actively entering the African market and participating in global cooperation of antimalaria drug research and development.

Today, Artesun<sup>®</sup> (artesunate for injection), independently developed and manufactured by Fosun Pharma, has treated more than 48 million severe malaria patients worldwide (most of which are African children under the age of five) by the end of 2021, helping Africa to reduce the malaria mortality rate by about 37.3% between 2000 and 2020 and the average life expectancy of people in African countries in 2020 has increased by 9.4 years compared with 2000.

Cyrus feels a bit more relieved every time these numbers go up. He and his team are working towards the goal of "eliminating malaria in Africa", which is also the common aspiration of "the company headquarters in Shanghai".

"We will actively participate in public health improvement and make steady efforts to build a malaria-free world." Fosun expressed.

WRITTEN By ZENG YAN  
VIDEO By WANG LIJIA

Merlin Chelliah from Singapore, who is currently the Chef de Village at Club Med Kiroro Peak in Hokkaido, Japan. In the past 16 years, Merlin, as a G.O, served countless guests at Club Med Bintan, Club Med Beidahu, and Club Med Lijiang and witnessed Club Med's development. Merlin's story is a story about happiness. She welcomes guests to their "home" away from home with a sincere smile and warm greetings, bringing happiness to them.

At 7:00 in the morning, Merlin carefully inspects every detail of the restaurant including table setting, kitchen preparation, and dishes to make sure that everything is up to standard. The snow season in Hokkaido is approaching, and the busiest time of the year is also around the corner. In order to maximize ski time, most guests leave their rooms around 8:00 in the morning, which is a good time for Merlin to interact with guests.

### *From G.O to Chef de Village*

The number of families taking ski holidays increases exponentially on weekends or during the holidays in the snow season. A large number of guests usually arrive at the resort with ski equipment and luggage in the afternoon.

Some guests may be a little tired from the long journey and the lobby staff will undoubtedly get a bit busier. Merlin rushes to the lobby, temporarily opens the restaurant, prepares hot beverages, and quickly allocates additional staff to effectively manage the customer flow, ensure the comfort of the lobby, and ease guests' travel stress.

### *A "happy spirit" on stage*

By day, she is a super "Chef de Village"; by night, she is a "happy spirit" on stage. The evening show with Merlin is often the liveliest show at the resort. For Merlin, the best part of the day is to perform musicals, sitcoms, magic shows, etc. with the G.O team.

From backstage to onstage, Merlin is in charge of every detail of the stage, while immersing herself in the performance. "The evening show is one of the core activities of Club Med. We hope that adults as well as children can fully enjoy the show!"

"Welcome Home" is Merlin's favorite line, and it's the first thing every guest hears from Merlin when they arrive the resort. For Merlin, her 16 years of experience at Club Med is like a journey with multiple interchanges. Despite different sceneries, Merlin remains true to her original aspirations of freedom, friendliness and self-discipline and calmly embraces the next challenge with new goals and new vision.

From G.O to the Chef de Village of different Club Med resorts in Indonesia, Japan, and China, Merlin has experienced many changes in tasks during her 16 years at Club Med, her mentality has also matured. When asked what is the biggest reward of working in different countries? Merlin's answer was unexpected. She said, it is the different G.O teams. Adapting and accepting different cultures, respecting each country where the resort is located, interacting with different people are all very interesting and challenging. "Diversity" is one of the essence of Club Med

Merlin Chelliah, Chef de Village of Club Med Kiroro Peak

Lorenzo Pistocchi, Shoe Last Artisan of Sergio Rossi

Lorenzo Pistocchi:

## Sculptor Who Works on the Art of Shoe- making

WRITTEN By LI JIAYIN  
VIDEO By COURTESY OF SER-  
GIO ROSSI

Sergio Rossi, an Italian luxury footwear brand, is now part of the Lanvin Group and also a valuable member of Fosun's Happiness segment. As an artisan making shoe lasts for Sergio Rossi, Lorenzo Pistocchi is responsible for giving a refined structure to the final product based on the design drawing, witnessing the creation of every piece of "ready-to-wear artwork".

As shoes are made to be worn, a last which is made for shoemaking is the soul of a shoe. Each last is meticulously crafted by designers and artisans.

Loved by international celebrities such as Rihanna, Taylor Swift and Paris Hilton, Sergio Rossi offers gorgeous and comfortable shoes and the secret lies in its shoe lasts.

Despite the fact that women's footwear almost invariably features a high and thin heel, Sergio Rossi shoes are not only stunning on the foot but also comfortable to wear as most of its shoe lasts are designed with a relatively high arch so that the shoe uppers can perfectly fit women's foot dimensions and contours. Italian artisan Lorenzo has been working in the shoemaking industry for 32 years and is now an artisan making shoe lasts for Sergio Rossi.

### *A Last is the Soul of a Shoe*

"Mr. Sergio Rossi taught me a valuable secret of shoemaking decades ago that lasts are a fundamental element in giving the proper shape and the perfect fit for high-heels and also a defining factor in providing both comfort and confidence to female wearers," said Lorenzo.

Design drawings are only gen-

eral representations of ideas and styles. Therefore, it takes numerous trials, tiny adjustments and tests to technically transform a last based on aesthetic conceptions into an end product that is both good-looking and comfortable to wear.

Lorenzo usually works on a bench piled high with design files and tools. As most of his jobs need to be done by hand, his studio looks very much like a carpenter's workshop heaped with various archived files for shoes and many hand-held tools.

### *Each Pair of Shoes is a Piece of Art- work*

Lorenzo knows well that the way each element come together makes all the difference in making a pair of great shoes in a way like an orchestra.

At Sergio Rossi's factory, it takes, on average, 110 steps to build a classic pair of heels and more for something elaborate. Behind each finished product, it involves hundreds of hours of mold designing and making, thousands of hours of skill building as well as tens of thousands times of evaluations, discussions and trials.

"Each time we draw ideas and experience from past projects, and file down those make-or-break details and learn from them. That is how we continue to make progress and stay ahead despite facing complicated and shifting demands," said Lorenzo.

As an artisan making shoe lasts for Sergio Rossi, Lorenzo is not only an Italian craftsman whom designer Francesco Russo calls "Golden Hands" but also a sculptor working on the "art of shoemaking". For him, each pair of shoes is not just a product, but a piece of artwork.

**WRITTEN By LI JIAYIN**  
**VIDEO By COURTESY OF**  
**WOLVES**

December 20, 2022, the 22<sup>nd</sup> World Cup has ended while people will continue to play football. The expert in this issue is about football. He is a 'backstage crew'. Jonathan Hunter-Barrett is the academy manager at Wolverhampton Wanderers Football Club (Wolves) who has more than 15 years of coaching experience.

Wolves Academy remains one of the six academies in England awarded an unconditional three-year certificate by the Football Association, tied with Chelsea and Manchester City. Young players who come here usually have high expectations. The Academy set no limits on the specific age and number of recruits. Potential matters the most.

### *Welcome to Join Wolves Academy*

Wolves Academy take their boys away on tour to quite a lot to different countries. They've been to China, Dubai, across Europe in the past and Wolves take them to tournaments in this country as well. They try and provide them with lots of different life experiences alongside the football, but do that through the travel. "The purpose is to give the players bespoke opportunities to develop and learn. It puts them under pressure." Jonathan Hunter-Barrett said.

As for Wolves, personality is the key point to be considered potential players. In addition to physical fitness and strategies, internal drive and an "always learning mentality" are what they always look for.

Jonathan explained the reason why they were the factors for Wolves to choose group members. "Internal drive is critical because it determines whether a person can

control his emotions. Focus is also very important. We can guide and nurture them in these aspects, but they must be internally motivated to be trained. At the end of the day, personality determines whether they can go on this career path."

### *Helping Young Players Get on the Big Stage*

At the age of 15, Jonathan has also thought about being a professional football player, but he quickly realised that he was not capable to be a professional football player. But because of loving football, his first job in football industry was being a volunteer at Walsall Football Club when he was 10 years old. At that time, He was very happy to be able to work with players and discovered that he was capable and good at helping them, in terms of travel and daily life. Being able to realise his value in the field he is interested in is one of the main motivations that made he himself choose this career.

"I am willing to seek self-improvement to be better at my job. For example, while taking practical courses for UEFA B and UEFA A licenses, I also studied for a master's degree in sports management, hoping to do a better job in the constant self-challenge and improvement." Jonathan smiled. Helping young players get on the big stage is his responsibility and make he feel satisfied to himself.

Established in 1930s, Wolves Academy has a mature youth training system, which has teams from U7 to U21, covering professional coaching, sports science, data analysis, etc. Thanks to it, Wolves produced many talents.

Jonathan Hunter-Barrett, Academy Manager of Wolverhampton Wanderers Football Club

## HUNTING FOR QUALITY PRODUCTS AND LAUNCHING NEW OFFERINGS

As Fosun ushers in the 30<sup>th</sup> anniversary of its establishment, its mission of “creating happier lives for families worldwide” becomes more defined. By looking into the sectors on the front end of various businesses of Fosun's ecosystem, we hunt for quality products for our family customers.

New Products Release spotlights quality products and services from brands under Fosun in the hope of showcasing happy moments in different aspects of life. It is not simply about launching new products but it also represents the continuous creation to satisfy people's pursuit for a brighter life. Our life is inseparable from various products and services. For instance, we need maternal and infant essentials to take care of newborns, we enjoy wine and spirits to celebrate every milestone in life, we dress up to appreciate the better part of life, we travel to explore the world, we buy insurance to protect ourselves and our family. Fosun's development owes much to its three-pronged competitive edge including innovation, creation and new products release which have been constantly sharpened over the past thirty years.

This edition of New Products Release features 7 products, which are certainly not enough to fully showcase Fosun's product competitiveness, but these products represent the endeavors of Fosun to create happier lives for families worldwide with innovation as its core competency.

## LANVIN 155 PENCIL Bag in Shiny Red

LANVIN 155 PENCIL bag in shiny red is presented as a special edition to celebrate Fosun's 30<sup>th</sup> anniversary.

LANVIN PENCIL is an elegant box-shaped bag with a luxurious luster and silky touch. The gold-tone clasp is adorned with the iconic mother-daughter emblem depicting Ms Jeanne Lanvin and her daughter to symbolize an enduring sense of happiness.

As the most iconic bag set among LANVIN collections, the PENCIL collection is an integral part of LANVIN leatherware.

## Wolford x Fosun Limited-Edition Gift Set

As a tribute to Fosun's 30<sup>th</sup> anniversary, the luxury skinwear brand Wolford launched a pajamas gift set for couples, bringing happiness to families.

The pajama set is made from mulberry silk with a buttery soft touch to the skin. The pocket on it is embossed with a subtle and chic handwritten Wolford logo. The pajama set comes in a gift box for an extra touch of elegance.

## TOM TAILOR x Fosun 30<sup>th</sup> Anniversary Edition Polo Shirts

TOM TAILOR polo shirts feature a simple and timeless design with fine details encapsulating its quality. They are made of breathable cotton, one of the most advanced fabrics.

The polo shirts are both water-proof and breathable on the front and moisture-wicking on the back, making them the perfect undershirt for business professionals.

## SJ Monogram Print Dress

This year marks the 60<sup>th</sup> anniversary of ST. JOHN, which coincides with the 30<sup>th</sup> anniversary of Fosun. On this occasion, ST. JOHN unveils a new logo depicting a crochet hook with a double J in the shape of the letter S as a tribute to its classic knitting craftsmanship. This design is a modern take on classics, carrying on the heritage from the past and starting a new chapter with Fosun.

## SHINING LIKE STARS

Over the past thirty years, more than a hundred brands around the world have joined the Fosun family, forming a treasure trove of brands. Brand Wall provides us with an opportunity to set our sights on these stellar brands and to explore their past, present and future.

A brand plays a pivotal role in opening a window for people to get to know a company or a product. Looking back at the very beginning, Pan Yunduan first built the Yu Garden in Shanghai in 1559. Seven years later in England, Sir Thomas Gresham founded London's first purpose-built center for trading stocks. Back to the present, several brands have just made their debuts at the booth of Fosun Health during the fifth China International Import Expo (CIIE) just a while ago. Over the past four-hundred years, brands of all stripes, both time-honored and emerging ones, have been brought together in Fosun, shining and shimmering like stars in the sky.

The hundred or so brands presented in Brand Wall outline the footprint of various sectors in the ecosystem of Fosun. With the nourishment from Fosun, these brands have been thriving and prospering.

Office Building of Royal Exchange

## RESOLUTION PROPERTY

1566

In 1566, Sir Thomas Gresham, father of the British banking industry, established the Royal Exchange, the first center of commerce built specifically for stock trading in London. In 2018, Fosun's portfolio company Resolution Property formally acquired the long-term revenue right of the offices of the Royal Exchange Building.

In 2014, Fosun has signed a strategic cooperation agreement with Fidelidade.

## FIDELIDADE

1808

In 1808, the Portuguese insurer BONANÇA was founded. It is the predecessor of FIDELIDADE and one of the oldest insurance companies in Europe. Established in 1835, FIDELIDADE is a pioneer in life insurance. In 2012, these two insurance companies merged under the brand FIDELIDADE. In 2014, FIDELIDADE joined Fosun, witnessed by Chinese leader and the then Portuguese President Anibal Cavaco Silva.

Silver Cross Jet3 Baby stroller

## Silver Cross

1877

In 1877, British engineer William Wilson invented the world's first pram by incorporating a spring system and a foldable roof into the baby carriage, in order to make it easier for his wife to take their children out. Silver Cross brand came into being. Ever since 1910, Silver Cross has become the pram of choice for the British royal family. In July 2015, Silver Cross joined Fosun.

LANVIN Spring/Summer 2023 Collection and new products

## LANVIN

1889

In 1889, Jeanne LANVIN opened her own fashion house in Paris and launched the LANVIN brand, triggering a boom of the haute couture boutiques around the world. In February 2018, LANVIN joined Fosun. On 17 October 2020, LANVIN presented the Spring/Summer 2021 show along Yuyuan's 400-year-old nine-turn (or: Zigzag) bridge, setting off a huge wave of fashion in the brightly-lit oriental garden.

1796

German private bank HAL building

In 1796, Hauck & Aufhäuser was established. It is one of the few independent private banks in Germany that provides comprehensive consulting services and asset management for private, corporate and institutional clients. In September, 2016, Fosun completed the acquisition of Hauck & Aufhäuser, building another financial bridge between Chinese and European companies. On 8 October 2021, H&A announced the successful wholly-owned acquisition of Bankhaus Lampe. After the merger, it was renamed as Hauck Aufhuser Lampe (HAL) and became a large German private bank with more than 1,300 employees, more than EUR200 billion in assets under management, and nearly EUR10 billion in total assets.

1841

In 1841, Englishman Thomas Cook organized a 500-person group tour between Leicester and Loughborough, England. That was the first commercial travel in the world. And the world's first travel agency was thus born. In November, 2019, Fosun Tourism Group announced the acquisition of Thomas Cook and its hotels Casa Cook and Cook's Club. On 18 July 2020, the Thomas Cook Lifestyle Platform was launched globally and became an online portal for the FOLIDAY ecosystem to reach consumers directly.

1877

In April 2018, the Wolves won the Championship.

In 1877, John Baynton and John Brodie, two pupils of St. Luke's Church School in Wolverhampton, England, established St. Luke's F.C., the predecessor of Wolverhampton Wanderers. In 1954, the Wolves won the top British league for the first time. In July 2016, Wolverhampton Wanderers FC joined Fosun. In 2018, Wolverhampton Wanderers returned to the Premier League. To the date, Wolverhampton Wanderers ranked seventh for two consecutive seasons.

St Hubert plant-based milk collection and butter products

In 1904, the French health food maker St Hubert was set up. In July 2017, St Hubert joined Fosun. - ✦ Global emergency assistance
- ✦ Fosun Foundation

SPECIAL ISSUE

## BUSINESS FOR GOOD

In the 30<sup>th</sup> year since its establishment, Fosun as a China-based global enterprise continues to its undertakings of achieving the common good of society while creating business value. Mr. Guo Guangchang, Chairman of Fosun International, once described the relationship between corporate growth and its social responsibility in four words: developing business for good. "Fosun firmly believes that business should be developed for a good cause, and we should always be grateful no matter what challenges lie ahead of us."

In 2012, Fosun founded Fosun Foundation, making it one of the first private enterprises in Shanghai to establish a public welfare foundation. As Fosun expands its footprint globally, Fosun Foundation has also been engaging in a variety of public welfare endeavors around the world. Fosun never misses out any opportunity to play its part in the efforts pertaining to our times, such as emergency assistance, assistance in fighting against malaria in Africa, poverty alleviation, rural revitalization, youth entrepreneurship and innovation as well as public art education . We have compiled some important moments of Fosun and its global partners helping to resolve the shared problems faced by human beings into Contribution to Society.

These efforts constitute only a small part of Fosun's public welfare undertakings. Leaving the past behind, we start afresh. Upholding the value of "Self-improvement, Teamwork, Performance, Contribution to Society", we will take Fosun's 30<sup>th</sup> anniversary as a new starting point to continuously innovate products and services, create greater social value and forge ahead to improve social well-being.

# Together We Build a Malaria-Free World

By KAREN GUO

On 8 November 2022, the 1st “In Shanghai, For the World” on the 5th China International Import Expo (CIIE) has announced Fosun International the IP SHANGHAI Global Communications Corporate Case Best Practice Award, in recognition of its outstanding practices in global public health, including anti-malaria and anti-epidemic efforts.

## *Self-developed and Manufactured Artesunate for Injection*

On 21 December 2005, artesunate tablet innovated by Fosun Pharma became the first pharmaceutical product prequalified by WHO (WHO-PQ), representing a breakthrough for the Chinese pharmaceutical industry. In 2011, Artesun®, artesunate for injection, which was self-developed and manufactured by Fosun Pharma, was recommended by the WHO as a first-line treatment of severe malaria. By the end of 2021, it has been used to treat over 48 million severe malaria patients worldwide.

## *Using Chinese Antimalarial Drugs in Africa*

In order to achieve the ultimate goal of building a malaria-free world, Fosun, Cyrus Baidoo, has gone to the front line in Africa, where malaria is the most serious, and helped and cured many malaria patients with Chinese antimalarial drugs.

From being unfamiliar with and distrusting Chinese companies to now,

where Fosun Pharma has become a global leader in malaria drugs and one of the most influential Chinese pharmaceutical brands in Africa, Cyrus witnessed the rapid development of Fosun Pharma in the field of antimalarial drugs. As of January 2022, Guilin Pharma, a subsidiary of Fosun Pharma, has a total of 30 antimalarial products prequalified by WHO (WHO-PQ), including 26 finished dosage forms and four APIs, making Fosun Pharma the leading antimalarial drug manufacturer with the most certifications.

In August 2018, Fosun Pharma's SPAQ-CO® Disp (co-packed sulfadoxine-pyrimethamine dispersible tablets and amodiaquine dispersible tablets), which indicated for the prevention of malaria in children, was pre-qualified by WHO (WHO-PQ). By the end of 2021, around 175 million children in high malaria transmission African countries had benefited from the “Seasonal Malaria Chemoprevention Program”, for which SPAQ-CO® Disp is used as the core drug to effectively reduce the morbidity of malaria in children under five years old in Africa. Guo Guangchang said, “We will actively participate in public health improvement and make steady efforts to build a malaria-free world.”

Fosun Pharma's SPAQ-CO® Disp prevented children from malaria.

# From Pramerica Fosun Spirit of Community Awards to Protechting, Fosun Leaves Public Welfare Footprints Globally

As its presence radiates from Shanghai to the rest of the world, Fosun has been making unremitting efforts for public welfare and has been involved in a variety of global events.

## Promoting Integration of Chinese Youth Public Welfare with International Standards

As early as 2013, which was the second year after the establishment of the Fosun Foundation, Fosun and the Prudential Financial, Inc. of America established a joint venture company in China, Pramerica Fosun Life Insurance. Originated from the Pramerica Spirit of Community Awards, running for 18 years, the Pramerica Fosun Spirit of Community Awards was launched in China.

## Fosun Sino Tai Chi Helps Delaying Parkinson's Disease

In February 2018, Fosun Foundation, together with the Neurology Department of Ruijin Hospital and Sino Taiji, jointly launched the public welfare

project “Tai Chi Training Delays Alzheimer’s Disease” to provide professional Tai Chi classes to patients with mild cognitive impairment (MCI), in combination with medical experts to track the training progress.

## Protechting Facilitates the Introduction of Overseas Start-ups to China

In 2015, Fosun started Protechteng, a global youth startup acceleration program. After being held for seven years, it has attracted nearly 1,000 start-up teams from 50 countries and regions and facilitated the development of more than 50 pilot projects and the growth of 6 youth entrepreneurship projects to a larger scale.

The annual “Geek Davos” Global Web Summit was held in Lisbon in November, 2022. Protechtig was invited as a strategic partner of the summit. Meanwhile, three teams, uMore, Automaise and Tucuvi also came for road show.

# Emergency Assistance: Fosun Always Responds 0.01 Second Quicker

What can one do in 0.01 second? It is often considered as an unquantifiable amount of time. For Fosun Foundation, this difficult-to-measure “0.01 second” represents the combination of speed and quality.

## *To Global Anti-epidemic Demands*

In 2020, the COVID-19 pandemic put the whole world to the toughest test than ever before. Fosun urgently leveraged its global network to initiate a global deployment of medical supplies, and provided strong support for Wuhan and other cities in Hubei province in an all-out effort. In March 2020, Fosun deployed medical supplies of masks, protective suits, oxygen concentrators and nucleic acid detection reagents to overseas countries and regions.

## *Combating Floods and Fighting COVID-19*

Since 16 July 2021, extreme heavy rainfall in Henan has caused severe waterlogging in many places. On 21 July, Fosun set up an emergency working group on flood control and disaster relief. Fosun Foundation led a coordinated effort with Fosun Beiling and Fosun Pharma to donate “all-terrain vehicles” and “mobile X-ray machines”.

Six months later, on December 26, 2021, the first batch of protective suits donated by social organizations after the outbreak arrived in Xi'an and 43,972 protective suits and 9,200 pairs of protective shoe covers were handed over to the People's Government of Yanta District in Xi'an. Before that, 100,000 medical gloves, 20,000 masks and 800 bottles of sanitizer had been handed over to the Xi'an Red Cross Society, and 3,000 cans of high-protein and low-sodium nutrition products for kidney dialysis had arrived at Xi'an Gaoxin Hospital.

## *Amid Challenges from Epidemic in Shanghai*

On 11 March, 2022, Li Haifeng, Chairman of Fosun Foundation, announced to reactivate the anti-epidemic command mechanism. Fosun successfully carried out “Community Support”, “Care for Elderly” and “Care for Children”. At the same time, Fosun continued to donate anti-epidemic materials and daily supplies to hospitals, mobile cabin hospitals, colleges and universities.

# Dialogues Between Fosun Foundation and City: Delving into the Relationship Between Business and Art

By XIE SHICHEN,  
DORIS DUANMU

From 2016 to 2022, Fosun Foundation was established successively in Shanghai and Chengdu. Over the years, the two art centers have carried out extensive exchanges with the cities they are located in.

## *Stories of Shanghai shined through 300 LEDs*

On September 1, 2022, the historical style protection project of the Fuyou Road plot in Huangpu District was announced to be the main body of implementation, and Fosun Yuyuan Shares became one of the main bodies of implementation. According to the plan, the existing Yuyuan Shopping Mall and BFC Bund Financial Center will be combined with the upcoming second phase of Yuyuan Garden to form a super cultural and commercial complex "Greater Yuyuan Area" with a total construction area of more than 1 million square meters, fully interpreting Oriental life aesthetics.

Located in the BFC, nicknamed as "a dancing house", Fosun Foundation (Shanghai) has also been engaged deeply with oriental life aesthetics, therefore serving as a vivid expression of it to the world. On the roof of it, a public artwork is displayed as part of the permanent collection of Fosun Foundation. It is the

"Counter Sky Garden" designed by Japanese artist Tatsuo Miyajima, expressing 300 stories by 300 different LED lights.

## *Take a deeper look at Chengdu at the Fosun Foundation (Chengdu)*

Fosun Foundation (Chengdu) located in the Gaoxin District of Chengdu was opened to the public on 30 June, 2022, as the first branch of Fosun Foundation (Shanghai). The first exhibition held here is "Invisible Life" by Shuhei Aoyama. Fosun probes into the relationship between business and art through dialogues with and observation of cities. Wang Jinyuan, Honorary Chairman of Fosun Foundation and Chairman of Fosun Foundation (Shanghai) said that "It now serves as an all-embracing cultural hub that integrates tradition and modernity, and demonstrates inclusiveness and openness to Chengdu and the rest of the world. It will also be a fashion landmark and a source of creativity."
